Guide to the CCES Cumulative Common Content (2006 - 2019)

Shiro Kuriwaki*

Guide last updated: 2020-04-06

Cite this dataset as:

Kuriwaki, Shiro, 2019, "Cumulative CCES Common Content (2006-2019)", doi:10.7910/DVN/II2DB6, Harvard Dataverse, V4.

This dataset combines fourteen years (2006 - 2019) of the Cooperative Congressional Election Study (CCES). The CCES is an online survey conducted around November of each year, asking a range of questions on political behavior and public opinion. Its principal investigators are Stephen Ansolabehere, Sam Luks, and Brian Schaffner.

CCES questions change from year to year, so this cumulative file only includes a subset of those questions that are standard. Users can still merge in year-specific questions easily into this cumulative file and take advantage of its harmonized variables, as explained below.

This dataset was constructed from each year's full CCES, all of them publicly available as separate datasets on dataverse. The final product is a tibble-style data frame (built in R) that is also available as a Stata dta file. In addition, the same dataset is available on Crunch, an analytics interface optimized for survey datasets.

Please note that this cumulative dataset makes some modifications to the original CCES datasets for comparability. These modifications are only made when differences are deemed sufficiently minor, and are documented in source code (see below). However, for details on the survey methodology and a list of all questions, readers should consult the guides for each year.

- To see the source code, report a bug, or ask a question about the data, please feel
 free to file an issue from the source code repository. Alternatively, please contact me
 by email.
- To obtain the individual year's CCES datasets, search the CCES dataverse or access the CCES homepage. Sign-up to the Crunch dataset from the homepage as well.
- To understand the survey methodology, consult the Frequently Asked Questions page of the CCES homepage or the methodology section of a recent Common Content's codebook.

^{*}Department of Government, Harvard University. ORCID: https://orcid.org/0000-0002-5687-2647. Bug reports welcome. My thanks to Alexander Agadjanian, Steve Ansolabehere, Stephen DiMauro, Bernard Fraga, Nathan Kaplan, Mayya Komisarchik, Stephen Pettigrew, and Boris Shor for their suggestions and contributions. Thanks to Joe Williams at YouGov, and Jon Keane, Mike Malecki, and Gordon Shotwell at Crunch for their help.

Getting Started

The .Rds format can be read into R. This format preserves dataset properties such as the distinction between integers and doubles, and labelled variables. Unlike a .Rdata file, an .Rds file is assigned to an object.

```
cc <- readRDS("cumulative_2006_2019.Rds")</pre>
```

The dataset in R is best viewed with dplyr, although it can also be used without tidyverse.

```
library(tidyverse)
cc
```

A Stata dta version is provided as well. cumulative_2006_2019.dta can be read by Stata, or in R by the haven package

```
library(haven)
cc <- read_dta("cumulative_2006_2019.dta")</pre>
```

Labelled variables (for analysis in R)

A note on variable types. The R dataset stores variables in numeric, character, factor, or labelled class.¹ The first three classes are commonly used, but the lablelled format is more novel. labelled classes are numeric integers where each integer is associated with a label (See vignette here). This makes it equivalent to a factor but referenceable by its numeric value. It is essentially the labels in Stata and SPSS.

A labelled variable's labels are usually not shown. But recent versions of the haven package (version 2.1.0 or above) will display the associated labels in the Console if selected within tidyverse. This makes it immediately obvious which value is associated with which label:

```
select(cc, year, case_id, pid3)
```

```
# A tibble: 470,755 x 3
   year case_id
                           pid3
                      <int+lbl>
   <int>
          <int>
 1 2006 439219 1 [Democrat]
   2006 439224 4 [Other]
 3 2006 439228 1 [Democrat]
 4 2006 439237 1 [Democrat]
 5 2006 439238 1 [Democrat]
   2006 439242 3 [Independent]
 7
   2006 439251 2 [Republican]
   2006 439254 1 [Democrat]
9
   2006 439255 1 [Democrat]
10 2006 439263 1 [Democrat]
# ... with 470,745 more rows
```

¹Technically, this is now called a labelled_haven class, to disambiguate from an unrelated but older use of labelled in the Hmisc package.

Labels can be made explicit by coercing the labelled vector into a factor. However, this removes the numerical value codes of the labelled class.

Unlike factors, labelled variables can be referenced by their underlying numeric value. It is sometimes useful to treat survey values as numbers rather than as raw text, and the labelled calss allows you to do that.

In this cumulative (R) dataset, some variables are of class labelled, and some are of factor class. This is because the latter variables were different enough in their value codings across years that summarizing them into a single numeric value was difficult.

Adding more variables

As noted, the cumulative dataset only uses key variables from each year's common content. However,common content variables can be merged in.

In R, we recommend using the left_join or inner_join functions (or the base-R merge function). In Stata, use merge 1:1. In all cases, the combination of year and case_id **uniquely identifies each row** in the cumulative common content, so any merges should merge on year and the case identifier.

Features of the Cumulative Dataset

Beyond stacking together each year's common content, the cumulative dataset provides several additional features to facilitate analysis.

Unified Variable Names

Most variables in this dataset come straight from each year's CCES. However, it renames and standardizes variable names, making them accessible in one place. Please see the rest of this guide or the Crunch dataset for a full list and description of variables.

Chosen Candidate Names and Identifiers

One addition to this cumulative dataset are variables of candidate names and identifiers that a respondent chose. In the individual year's CCES datasets, typically the response values for a vote choice question is a generic label, e.g. Candidate1 and Candidate2. Then, separate variables of names and parties correspond to each Candidate1 and Candidate2.

Instead, the cumulative dataset shows both the generic label *and* the chosen candidate's name and party, which will vary across individuals.

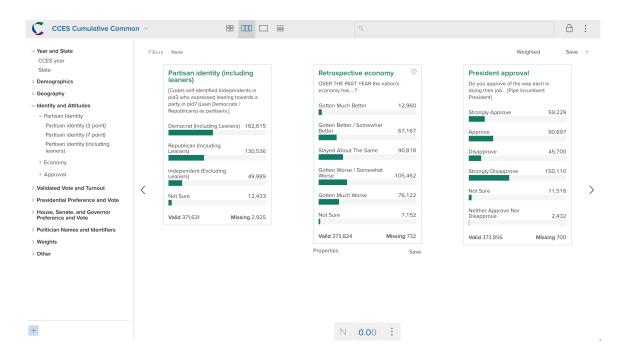

```
select(cc, year, case_id, st, matches("voted_sen"))
# A tibble: 470,755 \times 6
   year case_id st
                       voted_sen
                                           voted_sen_party voted_sen_chosen
   <int>
           <int> <chr> <fct>
                                           <fct>

Crunch

A version of the dataset is also included in Crunch, a database platform that makes it easy to view and analyze survey data either with our without any programming experience.

1. Obtain Access: For View access to the dataset (free), please sign up here or via the CCES website. For questions and more access, please contact the CCES Team.

2. Browse: Crunch offers a web GUI for quickly browsing variables:

3. Analyze: The crunch interface allows Viewers to make cross-tabs and bar graphs quickly.

Crunch datasets can also be manipulated from a R package, crunch. To learn more about the features, please take a look at their homepage crunch.io or their 5-minute demo video.

Variables

The sections below provide summary statistics and more information on each variable.

- The title shows the name of the variable as it appears in the dataset ("alias" in Crunch terminology), followed by a more descriptive name suitable for presentation ("name" in Crunch terminology).
- Question wordings, where applicable, immediately follow. Otherwise a description is provided
 in square brackets ([]). All square brackets, both in the description and the response
 options, indicate descriptions that are summaries rather than the question verbatim.
- A tabulation of response options (or summary statistics for numeric variables) follow. Numbers are unweighted counts.
- The "Years" bullet lists the years of the CCES in which data on the variable is available at all.
 If a year is not listed, either the question was not asked in the year or was not incorporated in the creation of this dataset.
- Finally, the "Limitations" bullet notes some of the caveats required when interpreting this variable. As this dataset is combinations of different surveys, some year-specific details on implementation are inevitably lost. For example, for all 2016 responses "Not Asked" and "Skipped" are both coded as a NA (missing) to stay consistent with past years that did not make that finer distinction.

Administration

year: CCES year

[Year of CCES Common Content]

	n
2006	36,421
2007	9,999
2008	32,800
2009	13,800
2010	55,400
2011	20,150
2012	54,535
2013	16,400
2014	56,200
2015	14,250
2016	64,600
2017	18,200
2018	60,000
2019	18,000

starttime: Start time

[Pre-election wave start time (up to second)]

```
Min. 1st Qu. Median "2006-10-07 00:02:34" "2010-10-12 08:17:58" "2013-11-23 15:04:56" Mean 3rd Qu. Max. "2013-09-26 03:40:41" "2016-10-12 11:20:19" "2019-12-05 18:34:04"
```

- Years: All of 2006-2019

tookpost: Took post-election wave

[Whether or not the respondent took the post-election wave of the survey (in even years)]

	n
Did Not Take Post-Election Survey	77,064
Took Post-Election Survey	300,892
(Missing)	92,799

 Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018, 2019 (Post-election wave only exists for even years)

Weights

weight: Survey weight (Year-Specific)

[weights for pre-election survey of each year]

```
Min. 1st Qu. Median Mean 3rd Qu. Max. 0.0000 0.4321 0.7302 1.0000 1.1734 15.0006
```

- Years: All of 2006-2019
- In even years, they are re-computed after vote validation has been computed and those re-computed weights are taken here when available. The weights applied to the sample (which is originally drawn from a matched sample) are constructed to make each year's respondents' pool representative of the national adult population. See the methodology section of the 2016 Guide for details.
- Limitations: Only specific to each year. Built off of the entire pre-election wave sample, but not necessarily to adjust post-election wave respondents. See weight_post

weight_cumulative: Survey weight (Cumulative)

[weight variable with simple adjustment: multiplied a constant within year to make years comparable]

```
Min. 1st Qu. Median Mean 3rd Qu. Max. 0.0000 0.2484 0.4686 0.7873 0.9277 19.3959
```

- Years: All of 2006-2019
- Limitations: Only a simple transformation of weight. Specifically, weight_cumulative is weight divided by the year-specific factors shown in the following table. For example, all weights in the 2016 common content are divided by about 2.44, because it has about twice as many observations as the other datasets.

Observations	Factor
36,421	1.38
9,999	0.38
32,800	1.24
13,800	0.52
55,400	2.09
20,150	0.76
54,535	2.06
16,400	0.62
56,200	2.12
14,250	0.54
64,600	2.44
18,200	0.69
60,000	2.27
18,000	0.68
	36,421 9,999 32,800 13,800 55,400 20,150 54,535 16,400 56,200 14,250 64,600 18,200 60,000

rvweight: Survey weights to validated registered voters

[weights to validated registered voter population]

- Years: 2018
- In 2018, YouGov computed weights after vote validation to weight to the target population of registered voters. See the methodology section of the 2018 Guide for details. For this reason, and to distinguish it from previous year's post-validation weights, the cumulative renames the 2018 vvweight into rvweight.
- Limitations: Only specific to each year. Built off of the entire pre-election wave sample, but not necessarily to adjust post-election wave respondents. See rvweight_post

rvweight_post: Survey weights to validated registered voters, post-election wave

[weights to validated registered voter population, post-election wave]

- Years: 2018
- Limitations: Only available for some even years.

weight_post: Survey weight for post-election wave

[weight for post-election wave respondents. Only available for some of the even years.]

- Years: 2012, 2016, 2018
- Limitations: Only available for some even years.

Geography

A series of variables for the respondent's location

- state: State (FIPS): [State (Imputed from input zipcode)]
- st: State abbreviation (FIPS): [State (Imputed from input zipcode)]
- dist: Congressional district number in current Congress: [Current Congressional District Number]
- dist_up: Congressional district number for upcoming Congress: [Upcoming Congressional District Number]
- cd: Congressional district in current Congress: [Current Congressional District]
- cd_up: Congressional district in upcoming Congress: [Upcoming Congressional District]
- zipcode: Zipcode of residence: "So that we can ask you about the news and events in your area, in what zip code do you currently reside?"
- county_fips: County of residence: [County (Imputed from input zipcode)]

```

```

- Years: All of 2006-2019
- Note the distinction between dist and dist_up, especially in 2012. The former should generally be used for linking respondents to their representatives at the time of the survey, where as the latter can be used for the district in which they will vote for. New districts were drawn in 2010-2012 and candidates ran in new district maps in the 2012 CCES. Because respondents would not be *represented* in the new district lines until January 2013, in the 2012 CCES dist is the old district line and dist_up is the new district line for the General Election.
- Limitations: Some years do not provide the variable relevant to dist_up, in which case
 the current district (dist) is assigned automatically. Thus, dist_up may not reflect district changes in off-cycle redistricting. Only residence (not registration) geographies included
 here; see individual years' for registration geographies.

Demographics

gender: Gender

"Are you male or female?"

	n
Male	217,949
Female	252,806

- Years: All of 2006-2019

birthyr: Year of birth

"In what year were you born?"

Min. 1st Qu. Median Mean 3rd Qu. Max. 1900 1950 1961 1963 1978 2001

- Years: All of 2006-2019

age: Age

[Approximate age computed from the year of survey minus Year of Birth]

Min. 1st Qu. Median Mean 3rd Qu. Max. 18.0 36.0 51.0 49.6 62.0 109.0

- Years: All of 2006-2019

educ: Education

"What is the highest level of education you have completed?"

	n
No HS	14,840
High School Graduate	130,123
Some College	116,433
2-Year	45,942
4-Year	106,727
Post-Grad	56,623
(Missing)	67

- Years: All of 2006-2019

race: Race

"What racial or ethnic group best describes you?"

	n
White	350,311
Black	51,102
Hispanic	38,156
Asian	9,598
Native American	3,790
Mixed	9,354
Other	7,708
Middle Eastern	736

- Years: All of 2006-2019

- Limitations: The "Hispanic" value may undercount self-identified Hispanics. See hispanic

hispanic: Hispanic

"Are you of Spanish, Latino, or Hispanic origin or descent? [Asked if response to race is not Hispanic]"

	n
Yes	11,399
No	337,449
(Missing)	121,907

- Years: 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019
- In years in which this question was fielded, this question supplements the race variable by asking those who did *not* respond "Hipsanic" in the race question.

citizen: Citizenship

[Based on self-report for immigration status]

	n
Citizen	437,930
Non-Citizen	7,045
(Missing)	25,780

- Years: 2006, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2016, 2017, 2018, 2019
- These come from the immigration status questions, which asks respondents between first, second, and third generation citizens, and other foreign-born citizens. Here we mark anyone who does not answer the last category to be a citizen.
- Limitation: Most of the missingness comes from 2007 and 2015, when the immigration status question does not appear to have been asked.

religion: Religion

"What is your present religion, if any?"

	n
Protestant	169,012
Roman Catholic	90,879
Mormon	6,689
Eastern or Greek Orthodox	2,189
Jewish	10,772
Muslim	2,037
Buddhist	3,601
Hindu	1,190
Atheist	20,343
Agnostic	24,318
Nothing in Particular	73,916
Something Else	28,393
(Missing)	37,416

- Years: 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019
- The response options have stayed largely consistent and follow that of Pew.

Family Status

marstat: Marital Status

"What is your marital status?"

	n
Married	259,450
Separated	7,885
Divorced	51,680
Widowed	22,188
Single / Never Married	106,418
Domestic Partnership	21,579
(Missing)	1,555

- Years: All of 2006-2019
- The option "Single" was used till 2016, which was then replaced by "Never Married" in 2017 and 2018.
- The option "Domestic Partnership" was used till 2016, which was then replaced by "Domestic / Civl Partnership" in 2017 and 2018.

ownhome: Home Ownership

"Do you own your home or pay rent?"

	n
Own	279,076
Rent	128,882
Other	17,820
(Missing)	44,977

- Years: 2006, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019

has_child: Parent of Young Children

"Are you the parent or guardian of any children under the age of 18?"

	n
Yes	107,607
No	315,904
(Missing)	47,244

- Years: 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019

no_milstat: Military Status (None)

[Based on military household question; neither respondent nor immediate family has served]

	n
Yes	189,823
No	270,838
(Missing)	10,094

- Years: 2006, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019
- The original question is of the form "We'd like to know whether you or someone in your immediate family is currently serving or has ever served in the U.S. military. Immediate family is defined as your parents, siblings, spouse, and children. Please check all boxes that apply.", where respondents can pick more than one of the options including the following: "I served personally", "Family served previously". The entry in the cumulative response only selects the "None" option. A value of no_milstat == "Yes" means that a respondent indicated they had neither served nor had a immediate family member who has served. To see the other responses, see the individual year's CCES.

Validations

Observations in even years include indicators for validated voting, which means that YouGov has matched survey respondents' personal identifiable information to public voter files, which in turn officially record whether a person has voted or not. Validation is often completed in the summer following the election. For more information, see Ansolabehere and Hersh (2012).

vv_regstatus: Validated registration status

[Validation results. Missing if validation was not conducted in the year. Categories are aggregated. Both Matched-not registered and unmatched are labeled as a no record.]

	n
Active	218,373
No Record of Registration	77,521
Unregistered	15,869
Dropped	6,607
Inactive	3,565
Multiple Appearances	1,600
(Missing)	147,220

Years: 2008, 2010, 2012, 2014, 2016, 2018Limitations: Collapses some response options

vv_party_gen: Validated registered party

[Validation results. Only available for some states and years]

n
79,041
68,895
37,600
29,494
13,874
2,376
1,635
1,511
537
265
44
38
11
9
5
235,420

- Years: 2012, 2014, 2016, 2018

- Limitations: Not available for some even years

vv_party_prm: Validated registered Primary party

[Validation results. Only available for some states and years]

	n
No Record of Party Registration	208,027
Republican Party	14,486
Democratic Party	12,783
No Party Affiliation	16
Liberatarian Party	11
Other	8
Green Party	4
(Missing)	235,420

- Years: 2012, 2014, 2016, 2018

- Limitations: Not available for some even years

Turnout

vv_turnout_gvm: Validated turnout General Election

[Validation results. All vote methods (polling, mail, early, unknown, etc..) are aggregated as a vote.]

	n
Voted	202,966
No Record of Voting	155,257
No Voter File	1,733
(Missing)	110,799

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- Limitations: Collapses most response options. For example, the particular voting method is collapsed into one category, even though gvm stands for General Election voting method. Also, the result of not matching to a voter file is collapsed with the result of matching to a voter file and having no indication of turning out to vote. The distinction is unclear in earlier years, and is thus collapsed for all years here. For finer distinctions, see the individual year's CCES.

vv_turnout_pvm: Validated turnout Primary Election (Congressional)

[Validation results. Congressional primaries.]

	n
No Record of Voting	225,737
Voted	96,435
No Voter File	1,363
(Missing)	147,220

- Years: 2008, 2010, 2012, 2014, 2016, 2018

- Limitations: See vv_turnout_gvm

Partisan Identity

pid3: Partisan identity (3 point)

"Generally speaking, do you think of yourself as a ...?"

	n
Democrat	167,172
Republican	123,840
Independent	131,094
Other	18,765
Not Sure	20,930
(Missing)	8,954

- Years: All of 2006-2019
- Limitations: Response options offer slightly by year. For example, the Not Sure option is not
 a response option in years 2006 and 2010. Open-text responses not included. 2010 values
 are from the post-election wave. 2020 values do not include the Not Sure option (option 5).

pid7: Partisan identity (7 point)

[Based on branching from Partisan Identity question]

	n
Strong Democrat	112,344
Not Very Strong Democrat	56,761
Lean Democrat	47,170
Independent	63,612
Lean Republican	49,281
Not Very Strong Republican	45,343
Strong Republican	79,181
Not Sure	14,047
(Missing)	3,016

Years: All of 2006-2019Limitations: See pid3

pid3_leaner: Partisan identity (including leaners)

[Codes self-identified Independents in pid3 who expressed leaning towards a party in pid7 (Lean Democrats / Republicans) as partisans.]

	n
Democrat (Including Leaners)	216,275
Republican (Including Leaners)	173,805
Independent (Excluding Leaners)	63,612
Not Sure	14,047
(Missing)	3,016

- Years: All of 2006-2019

- Limitations: See pid3

ideo5: Ideology (5 point)

"In general, how would you describe your own political viewpoint?"

	n
Very Liberal	42,728
Liberal	82,662
Moderate	146,842
Conservative	108,598
Very Conservative	54,765
Not Sure	33,386
(Missing)	1,774

- Years: All of 2006-2019

Economics and Income

faminc: Family Income

"Thinking back over the last year, what was your family's annual income? [Brackets coarsened]"

	n
Less than 10k	19,803
10k - 20k	34,469
20k - 30k	47,793
30k - 40k	48,521
40k - 50k	43,368
50k - 60k	42,308
60k - 70k	31,180
70k - 80k	33,792
80k - 100k	39,258
100k - 120k	28,577
120k - 150k	22,930
150k+	26,150
Prefer not to say	51,038
Skipped	12
(Missing)	1,556

- Years: All of 2006-2019
- Limitations: The income brackets provided changed slightly over time. The brackets in this cumulative dataset coarsens certain brackets, losing some granularity. In particular, from 2011-2016, respondents answering "over 150k" were asked a follow-up question to select one of several brackets above 150k. Here, these are top-coded and only labelled as "over 150k."
- The 2009 CCES did not have an option for 60-70k.

employ: Employment Status

"Which of the following best describes your current employment status?"

	n
Full-Time	186,667
Part-Time	48,011
Temporarily Laid Off	3,310
Unemployed	29,102
Retired	100,382
Permanently Disabled	27,096
Homemaker	33,526
Student	20,961
Other	11,442
(Missing)	10,258

- Years: 2006, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019

no_healthins: Uninsured

[Based on health insurance question; respondent has none of the insurance options given]

	n
Yes	44,261
No	347,210
(Missing)	79,284

- Years: 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019
- The original question is of the form "Do you currently have health insurance? (check all that apply)", where respondents can pick more than one of the options including the following: "Yes, through my job or a family member's employer", "Yes, through a government program, such as Medicare or Medicaid". The entry in the cumulative response only selects the "None" option. A value of no_healthins == "Yes" means that a respondent indicated they were not insured. To see the other responses, see the individual year's CCES.

union: Union membership

"Are you a member of a union?"

	n
Yes, Currently	30,503
Yes, Formerly	88,418
No, Never	307,894
(Missing)	43,940

- Years: 2006, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019
- Question wording and response options have been reworded to be harmonized across years.
 Please see each individual CCES for exact wording.
- The 2008 CCES in its common content has a union question that roughly combines both the union and union_hh question.

union_hh: Union membership in household

"Other than yourself, is any member of your household a union member?"

	n
Yes, Currently	39,311
Yes, Formerly	62,390
No, Never	319,096
Not Sure	3,576
(Missing)	46,382

- Years: 2006, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019
- Question wording and response options have been reworded to be harmonized across years.
 Please see each individual CCES for exact wording.
- The 2008 CCES in its common content has a union question that roughly combines both the union and union_hh question.

economy_retro: Retrospective economy

"OVER THE PAST YEAR the nation's economy has ...?"

	n
Gotten much better	31,757
Gotten better / somewhat better	104,958
Stayed about the same	126,496
Gotten worse / somewhat worse	117,032
Gotten much worse	78,787
Not sure	10,837
(Missing)	888

- Years: All of 2006-2019
- Limitations: Response options varies by year. Some are collapsed into one category (e.g. Gotten Better, presented in some years, and Gotten Somewhat Better, presented in other years, are collapsed into Gotten Better / Somewhat Better). Some are left as is. For example, Not Sure was not an option in 2009.

News Interest

newsint: News Interest

"Some people seem to follow what's going on in government and public affairs most of the time, whether there's an election going on or not. Others aren't that interested. Would you say you follow what's going on in government and public affairs .."

	n
Most of the time	234,647
Some of the time	109,997
Only now and then	52,172
Hardly at all	25,855
Don't Know	11,077
(Missing)	37,007

- Years: 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019

 Limitations: Not asked in 2006. Similar questions about watching TV news was asked in 2006, but not included in this cumulative file.

Approval

approval_pres: President approval

"Do you approve of the way each is doing their job... [Pipe Incumbent President]"

	n
Strongly Approve	97,838
Approve / Somewhat Approve	107,126
Disapprove / Somewhat Disapprove	48,372
Strongly Disapprove	203,121
Never Heard / Not Sure	13,057
Neither Approve nor Disapprove	443
(Missing)	798

- Years: All of 2006-2019
- Limitations: Neither approve nor disapprove only included in 2007.
- This question is asked in a grid format, along with Governors, Congress, and Courts.

approval_rep: House Representative approval

"Do you approve of the way each is doing their job... [Pipe Incumbent Representative's Name]"

	n
Strongly Approve	67,519
Approve / Somewhat Approve	148,751
Disapprove / Somewhat Disapprove	82,834
Strongly Disapprove	73,328
Never Heard / Not Sure	63,260
Never Heard of this Person	25,762
Neither Approve nor Disapprove	1,798
(Missing)	7,503

- Years: All of 2006-2019
- Limitations: Neither approve nor disapprove only included in 2007.
- This question is asked in a grid format, along with Senators (approval_sen1, approval_sen2).
- To see who [Representative] refers to for a particular respondent, see rep_inc (incumbent identifier in rep_icpsr)

approval_sen1: Senator 1 approval

"Do you approve of the way each is doing their job. . . [Pipe Incumbent Senator 1's Name]"

	n
Strongly Approve	60,977
Approve / Somewhat Approve	150,506
Disapprove / Somewhat Disapprove	94,700
Strongly Disapprove	92,858
Never Heard / Not Sure	48,507
Never Heard of this Person	17,210
Neither Approve nor Disapprove	1,413
(Missing)	4,584

- Years: All of 2006-2019
- Limitations: Response options varies by year. Some are collapsed into one category (e.g. Approve, presented in some years, and Somewhat Approve, presented in other years, are collapsed into Approve / Somewhat Approve). Neither approve nor disapprove only included in 2007.
- To see who [Senator 1] refers to for a particular respondent, see sen1_inc (incumbent identifier in sen1_icpsr)

approval_sen2: Senator 2 approval

"Do you approve of the way each is doing their job. . . [Pipe Incumbent Senator 2's Name]"

	n
Strongly Approve	65,698
Approve / Somewhat Approve	145,164
Disapprove / Somewhat Disapprove	92,000
Strongly Disapprove	93,440
Never Heard / Not Sure	49,762
Never Heard of this Person	18,184
Neither Approve nor Disapprove	1,158
(Missing)	5,349

– See approval_sen2

approval_gov: Governor approval

"Do you approve of the way each is doing their job... Governor of [Pipe State]"

	n
Strongly Approve	70,572
Approve / Somewhat Approve	145,296
Disapprove / Somewhat Disapprove	87,011
Strongly Disapprove	121,724
Never Heard / Not Sure	42,490
Neither Approve nor Disapprove	1,414
(Missing)	2,248

- Years: All of 2006-2019

Limitations: See approval_pres

To see who the Governor refers to for a particular respondent, see gov_inc.

Vote Choice Variables

A note on the terms "intent" and "voted": In this dataset we make the distinction between "intent" / "preference" vs. "voted" / "vote choice". "Intent" (or "preference") refers to the response to the prospective question of the sort "who would you vote for?" in the *pre-election* wave. "Vote choice" refers to the response to the retrospective question of the sort "in the election this November, who did you vote for?"

Response to the vote choice questions coalesces both *post-election* wave responses (the bulk of the responses) and pre-election respondents who reported having already voted early. In 2018, it also coalesces the responses to the straight ticket party option (CC18_409), so that those who selected the Republican straight party ticket in the applicable states will appear to have voted for the Republican candidate in all offices. The straight ticket party option was not asked in other years.

The cateogry "Did Not Vote" is recorded only when the respondent selects that option. Respondent who have missing values for intent or vote choice can also be non-voters for a variety of reasons. For general turnout, see the section on turnout.

Presidential Vote

intent_pres_party: President preference party

[Party of presidential candidate chosen in intent pres]

	n
Democratic	64,800
Republican	53,287
Other Candidate	4,013
(Missing)	348,655

⁻ Years: 2008, 2012, 2016

voted_pres_party: President vote in last election

[Party of presidential candidate chosen in last election]

	n
Democratic	162,905
Republican	145,634
Other Candidate	18,826
Did not Vote	25,949
(Missing)	117,441

- Years: 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019
- Note: In a presidential election year, this asks the vote of that year. The vote choice of the presidential election 4 years prior might be recorded separtely. For example, for respondents in 2012, voted_pres_party corresponds to their 2012 vote, while voted_pres_party_08 corresponds to their 2008 vote (which was asked in the same 2012 survey).

intent_pres_08: 2008 President preference (before voting)

"For which candidate for President of the United States would you vote?"

	n
John Mccain	13,322
Barack Obama	12,897
Ron Paul	535
Ralph Nader	209
Bob Barr	258
Cynthia Mckinney	74
Other	352
I Won't Vote in this Election	851
I'm Not Sure	1,697
(Missing)	440,560

- Years: 2008
- See intent_pres_party for vote choice in the most recent preceding presidential election into one party column.

intent_pres_12: 2012 President preference (before voting)

"In the race for President of the United States, who do you prefer?"

	n
Mitt Romney (Republican)	20,738
Barack Obama (Democratic)	24,401
Other	1,781
I Will Not Vote in this Election	1,467
I'm Not Sure	3,856
(Missing)	418,512

- Years: 2012
- See intent_pres_party for vote choice in the most recent preceding presidential election into one party column.

intent_pres_16: 2016 President preference (before voting)

"Which candidate did you prefer for President of the United States?"

	n
Donald Trump (Republican)	19,227
Hillary Clinton (Democrat)	27,502
Gary Johnson (Libertarian)	3,145
Jill Stein (Green)	1,400
Other	1,880
I Won't Vote in this Election	3,312
I'm Not Sure	6,536
(Missing)	407,753

- Years: 2016
- See intent_pres_party for vote choice in the most recent preceding presidential election into one party column.

voted_pres_08: 2008 President vote choice (after voting)

"2008: For which candidate for President of the United States did you vote? [see guide for wording in all years]"

	n
Barack Obama	73,986
John McCain	68,398
Other / Someone Else	4,204
Did Not Vote	18,227
Not Sure / Don't Recall	1,787
(Missing)	304,153

- Years: 2008, 2009, 2010, 2011, 2012
- Limitations: Response options offer slightly by year; some are collapsed into one.
- See voted_pres_party for vote choice in the most recent preceding presidential election into one party column.

voted_pres_12: 2012 President vote choice (after voting)

"2012: For whom did you vote for President of the United States? 2016: In 2012, who did you vote for in the election for President? [see guide for wording in all years]"

	n
Barack Obama	82,681
Mitt Romney	64,956
Other / Someone Else	5,890
Did Not Vote	2,839
Not Sure / Don't Recall	1,990
(Missing)	312,399

- Years: 2012, 2013, 2014, 2015, 2016
- Limitations: Response options offer slightly by year; some are collapsed into one.
- See voted_pres_party for vote choice in the most recent preceding presidential election into one party column.

voted_pres_16: 2016 President vote choice (after voting)

"2017: In the election for U.S. President, who did you vote for? [If reported voting] 2016: For whom did you vote for President of the United States? [Post-election]"

	n
Hilary Clinton	57,694
Donald Trump	49,751
Other / Someone Else	11,478
Did Not Vote	5,026
Not Sure / Don't Recall	527
(Missing)	346,279

- Years: 2016, 2017, 2018, 2019

- This variable coalesces two variables in the CCES: Either the response to the early vote question in the pre-election wave if the respondent indicates they have already voted, or if not, the response in the post-election wave.
- See voted_pres_party for vote choice in the most recent preceding presidential election into one party column.

House, Senate and Governor Vote

intent_rep: House preference (before voting)

"In the general election for U.S. House of Representatives in your area, who do you prefer?"

	n
[Democrat / Candidate 1]	128,231
[Republican / Candidate 2]	115,292
[Other / Candidate 3]	4,401
\$HouseCand4Name (\$HouseCand4Party)	37
Other	2,259
I'm Not Sure	70,460
No One	19,235
\$HouseCand5Name (\$HouseCand5Party)	23
I Won't Vote in this Election	2,269
\$HouseCand6Name (\$HouseCand6Party)	41
\$HouseCand7Name (\$HouseCand7Party)	20
\$HouseCand8Name (\$HouseCand8Party)	14
\$HouseCand9Name (\$HouseCand9Party)	1
\$HouseCand10Name (\$HouseCand10Party)	1
\$HouseCand11Name (\$HouseCand11Party)	3
(Missing)	128,468

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- Limitations: Only available for even years. The third party candidate is not specified for early years. The fourth candidate and below are not shown for most years. Response options differ by year.
- Note that it is not always the case that 1 is a Democrat and 2 is a Republican. When two Democrats are on the general ballot (e.g. in top-two primary states like California), both candidates are Democrats. Use intent_rep_party to see the party affiliation of the chosen candidate.
- Note that for each respondent, a name (and party affiliation) is shown in place of the square bracket values. To see the name of the candidate chosen, see intent_rep_chosen.
- [0ther / Candidate 3] refers to the third option presented, whereas 0ther refers to the unnamed choice after all numbered candidates.

intent_sen: Senate preference (before voting)

"In the race for U.S. Senator in your state, who do you prefer?"

	n
[Democrat / Candidate 1]	97,220
[Republican / Candidate 2]	82,433
[Other / Candidate 3]	4,477
\$SenCand4Name (\$SenCand4Party)	19
Other	1,713
I'm Not Sure	38,112
No One	12,419
I Won't Vote in this Election	1,145
(Missing)	233,217

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- Limitations: See intent_rep. When both senate seats are up for re-election in the same year, only responses to the first senate seat is incorporated. For the second senate seat, see individual year's CCES.
- See intent_sen_party for the party affiliation of the chosen candidate.

intent_gov: Governor preference (before voting)

"In the race for Governor in your state, who do you prefer?"

	n
[Democrat / Candidate 1]	74,561
[Republican / Candidate 2]	66,292
[Other / Candidate 3]	4,055
Other	1,390
I'm Not Sure	24,296
No One	7,991
I Won't Vote in this Election	466
(Missing)	291,704

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- Limitations: See intent_rep. For governor elections in odd years, see individual year's CCES.
- See intent_gov_party for the party affiliation of the chosen candidate.

voted_rep: House vote choice (after voting)

"For whom did you vote for U.S. House?"

	n
[Democrat / Candidate 1]	117,581
[Republican / Candidate 2]	111,255
[Other / Candidate 3]	2,786
\$HouseCand4Name (\$HouseCand4Party)	27
Other	3,120
I Did Not Vote In This Race	12,535
\$HouseCand5Name (\$HouseCand5Party)	24
Not Sure	4,493
\$HouseCand6Name (\$HouseCand6Party)	39
\$HouseCand7Name (\$HouseCand7Party)	15
\$HouseCand8Name (\$HouseCand8Party)	16
\$HouseCand9Name (\$HouseCand9Party)	2
\$HouseCand10Name (\$HouseCand10Party)	2
\$HouseCand11Name (\$HouseCand11Party)	3
(Missing)	218,857

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- This variable coalesces two variables in the CCES for years 2012 and onward: Either the
 response to the early vote question in the pre-election wave if the respondent indicates they
 have already voted, or if not, the response in the post-election wave.
- Note that it is not always the case that 1 is a Democrat and 2 is a Republican. When two Democrats are on the general ballot (e.g. in top-two primary states like California), both candidates are Democrats. Use voted_rep_party for party affiliation
- See voted_rep_party for party affiliation.

voted_sen: Senate vote choice (after voting)

"For whom did you vote for U.S. Senator?"

	n
[Democrat / Candidate 1]	86,668
[Republican / Candidate 2]	77,569
[Other / Candidate 3]	2,974
Other	1,967
Not Sure	2,094
\$SenCand4Name (\$SenCand4Party)	11
I Did Not Vote In This Race	4,789
(Missing)	294,683

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- This variable coalesces two variables in the CCES for years 2012 and onward: Either the response to the early vote question in the pre-election wave if the respondent indicates they have already voted, or if not, the response in the post-election wave.
- See voted_sen_party for party affiliation.
- Senate Special elections where both senate seats are up for election is often recorded as different columns in the year-specific CCES, but these are not collected in the cumulative.

voted_gov: Governor vote choice (after voting)

"For whom did you vote for Governor?"

	n
[Democrat / Candidate 1]	68,445
[Republican / Candidate 2]	63,434
[Other / Candidate 3]	2,800
Other	1,817
I Did Not Vote In This Race	10,116
Not Sure	1,091
(Missing)	323,052

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- This variable coalesces two variables in the CCES for years 2012 and onward: Either the
 response to the early vote question in the pre-election wave if the respondent indicates they
 have already voted, or if not, the response in the post-election wave.
- See voted_gov_party for party affiliation.

Metadata and Identifiers

Identifiers

The case identifier case_id is unique within the year and is identical to the case identifiers in the individual year's CCES. It should be used in conjunction with year for a unique identifier for the whole dataset. Some individuals across years may be the same YouGov panel respondent with different identifiers; for example the 2007 CCES draws from the 2006 CCES respondents.

Current Representatives' Name and Party

The four names in the three offices are representatives of the respondent at the time of the survey. Names are printed as shown, and similarly parties are shown if the particular year's CCES did not show party. For example, Senator Shelby is presented as Richard Craig Shelby, Richard C. Shelby (R), Richard Shelby (R), Richard C. Shelby (R), depending on the year. Party names are abbreviated down to initials (D for Democrat, R for Republican, I for Independent) in this dataset.

ICPSR Identifiers

Unique identifiers (ICPSR / Nominate for Congress, FEC for Governor) for the current representatives. Identifiers are not part of the individual year's CCES. Instead, I attempt to merge in these identifiers through a series of name and district merges.

The matching of identifiers to respondent occurs through matching by district, by district and last name, or both:

- For House representatives, we join on cong, st, and dist to a NOMINATE database that only consists of unique observations according to the key. For duplicates with regards to these three variables (e.g. in the rare case where a new representative comes into office mid-session), we match on cong, st, dist and last name.
- For Senators, we join entirely on cong, st, and last name

```
Rows: 470,755
Columns: 3
$ rep_icpsr <dbl> 20522, 20342, 29132, 29911, 29380, 20531, 29126, 29739, ...
$ sen1_icpsr <dbl> 40303, 15020, 29373, 15021, 14858, 49306, 40101, 15054, ...
$ sen2_icpsr <dbl> 29548, 49903, 14914, 40502, 40105, 40305, 40302, 29537, ...

- Years: All of 2006-2019
```

 Limitations: Please note there may be some incorrect merges, especially for nontraditional names and representatives who were elected in special elections and may not be in some datasets.

The unique identifiers can be used to join with other databases to append additional information such as committee membership and ideology scores, such as

```
Lewis, Jeffrey B., Keith Poole, Howard Rosenthal, Adam Boche, Aaron Rudkin, and Luke Sonnet (2017). Voteview: Congressional Roll-Call Votes Database. https://voteview.com/
```

The text responses that the respondent chose in each of the intent_/voted_ questions, if the respondent was a candidate. For example, respondent with case_id = 163051575 in the 2012 CCES chose the first option in the House representative preference question. intent_rep_chosen shows that this particular respondent preferred voting for Maxine Waters, one of the two Democrats in the race.

```

- Years: 2006, 2008, 2010, 2012, 2014, 2016, 2018
- Early years may mislabel the candidate's party, especially when the two candidates are of the same party (as in top-two primary states)

Party of Chosen Candidate

- Years: varies by office
- Early years may mislabel the candidate's party, especially when the two candidates are of the same party (as in top-two primary states)

Version History of Dataverse Releases

Dataverse assigns version numbers by incremeting a full number if any of the datasets change, and an incrementing decimal when the description changes.

Version 5.0

- Released 2020-XX-XX
- Enter 2019 common content (up to n = 470,755)
- Adds variable for employment, union membership, religion, citizenship, children, homewnership, lack of insurance, and lack of military members in immediate family.
- Adds a separate variable for intent/voted party choice in presidential race
- Add leading zeros to congressional districts in the first digits (e.g. "MA-1" is now "MA-01"),
 and create a variable cd_up similar to dist_up.
- Modify prepositions of value labels to lower case

Version 4.0

- Released 2019-09-09
- Enter 2018 vote validation
- Coalesce straight party ticket vote into vote choice entries
- Remove FEC identifiers

Version 3.0

- Released 2019-04-29
- Add 2018 Common Content before vote validation (up to n = 452,755)

Version 2.0

- Released 2018-04-16
- Add 2017 Common Content (up to n = 392,755)
- Corrects 2016 validated vote entries inherited from Common Content.
- Consolidates weights to a single column, using post-vote validation weights for even years.
- Adds hispanic and faminc variables

Version 1.0

- Released 2018-01-24
- First upload, covering 2006 2016 (n = 374,556)
